Message from the President 校長・言

In the past academic year, we have been grappling with the storm of the pandemic, which has completely changed things since its onset in 2020. Despite all the challenges, the University has achieved a phenomenal amount. One typical example is the School of Creative Arts (SCA), which is due to open its doors on 1 July this year. Our successful bid for the operation of Hong Kong's first Chinese Medicine (CM) Hospital in 2021 also marked a new milestone for the development of CM in Hong Kong.

Cultivating Creative Talent

HKBU is renowned as a cradle of creativity. To further augment human creativity in the arts world, HKBU is establishing the School of Creative Arts with a revitalised vision to nurture the next generation of creative talent for Hong Kong. Consisting of the Academy of Film, Academy of Music and Academy of Visual Arts, the newly established SCA will provide HKBU with an ideal platform to advance the arts and culture, as well as art-tech, in Hong Kong and the region.

This is undoubtedly the right move for HKBU. Apart from the global trends that are impacting the development of the arts, the National 14th Five-Year Plan has raised the level of support for Hong Kong to help it develop into a hub for arts and cultural exchanges between China and the rest of the world. By capitalising on the new opportunities and the latest technological advancements, and with the synergies created by the establishment of the SCA, the University will take the development of the creative arts to the next level, and set new standards for future teaching and research.

We are all excited by this latest development, and have high hopes for its future, especially when the Jockey Club Campus of Creativity is completed in 2024. The opening of this new campus, which will feature state-of-the-art facilities for a comprehensive range of creative arts disciplines, will certainly substantially strengthen the School's capacity to fuel the development of the creative arts. I hope you will all join me in rendering our full support to the School.

Chinese Medicine for the Community

Since the setting up of the fully-fledged School of Chinese Medicine (SCM) 23 years ago, the University has made great strides in the advancement of both CM education

and research to serve the community. During the fifth wave of the COVID-19 pandemic, HKBU's Chinese medicine practitioners reacted quickly to launch the "Free Online Consultation Service for COVID-19 Patients" in mid-February. As the number of confirmed cases surged, the HKBU Chinese Medicine Telemedicine Centre Against COVID-19 was set up in March to provide CM consultations and deliver dispensed herbal medicine to COVID-19 patients, all for free and with the support of alumni and the Tencent Charity Foundation. In addition, with the backing of its alumni, the Department of Social Work joined hands with SCM to provide emotional support and counselling services to those patients as well as their caregivers.

In late March, HKBU was appointed by the Government as one of the operators of the Kai Tak Holding Centre, providing CM-based treatments as well as counselling services to the elderly COVID-19 patients with mild symptoms who were staying there. This is another recognition of our CM services by the HKSAR Government, following the award of the operation service deed for Hong Kong's first Chinese Medicine Hospital to the University.

As the guardian of the University's proud heritage, I am delighted to be part of this notable and exciting journey. Let me pay tribute to the HKBU community members who have continuously supported the University and helped us sharpen our competitive edge. As Nelson Mandela said, "We can change the world and make it a better place. It is in our hands to make a difference." To that end, I call upon the support of our alumni to help make a difference to those in the Hong Kong community.

We look forward to welcoming you back on campus, and I wish you all the best!

THE NEW ERA OF ART-TECH

藝術科技的新時代

With the advancement of technology, the integration of arts and technology has become a global trend in art and culture. The HKSAR Chief Executive has, in her 2020 *Policy Address*¹, pledged to develop art-tech to bring new opportunities for the art and creative industries, and raise the soft power of Hong Kong. In response to this initiative and society's need, HKBU has strived to promote art-tech and nurture transdisciplinary talent.

The BUddies Magazine has invited the following guests and alumni to share their insights in art-tech: (1) The Honourable Mr Ma Fung-Kwok, GBS, JP, HKBU Honorary University Fellow, Member of the Legislative Council of the HKSAR Government, and Hong Kong Deputy to the National People's Congress of the People's Republic of China; (2) Professor Johnny Poon, Associate Vice-President (Interdisciplinary Research), Founding Dean of the School of Creative Arts, and Dr Hung Hin Shiu Endowed Professor in Music; (3) Professor Jeffrey Shaw, Chair Professor of the Academy of Visual Arts; (4) Dr Chen Jie, Assistant Professor of Department of Computer Science.

What is Art-Tech

The term art-tech was already coined in the 1960s as stated by Prof Jeffrey Shaw, when the Experiments in Art and Technology (EAT) was established in New York to promote collaborations between art and new technology. Thereafter, numerous similar art-tech platforms have emerged, examples of which include Austria's Ars Electronica, Germany's ZKM, Tokyo's ICC, Australia's ANAT, USA's MIT CAVS and Montreal's SAT.

Prof Shaw pointed out that art-tech is a cultural platform on which contemporary art research can be pursued. Artists apply technology in various types of visual and performing arts like dance, drama and music, the aim of which is to produce innovative transdisciplinary art forms. At the same time the platform can promote cross-sector collaborations among art practitioners and also bring about new types of interactive experience.

科技發展一日千里，科技與藝術的融合已成全球大勢所趨。香港特別行政區行政長官 2020 年的《施政報告》¹確立了發展藝術科技的政策，期望為藝術和創意產業帶來新機遇，提升香港的軟實力。為配合此政策及回應社會的需求，浸大在教育及科研領域致力推動藝術科技的發展及跨學科人才的培訓。

今期的《浸大人》請來以下嘉賓探討藝術科技這議題：(1) 馬逢國議員，GBS，JP，浸大榮譽大學院士、香港特別行政區立法會議員及香港特別行政區全國人民代表大會代表；(2) 潘明倫教授，浸大協理副校長（跨學科研究）、創意藝術學院創院院長及孔憲紹博士音樂教授；(3) 邵志飛教授，浸大視覺藝術院講座教授；(4) 陳杰博士，浸大計算機科學系助理教授。

Prof Johnny Poon explained that the integration of art and technology reflects the advancement, innovation and progression of artistic creation. Technological means can stimulate novel composition and opportunities in art, and is the key to drive and shape the landscape of contemporary art. At the same time, artistic innovation can inspire breakthroughs in technologies, and vice versa. Technological advancement also affects artists in how they create and present their art work, and collaborate with each other. Similarly, the new art-tech platform will influence audience's consumption behaviour, reception, as well as their appreciation and enjoyment of art. Dr Chen Jie added that taking concerts as an example, the traditional ones allow primarily the appreciation of the audio effect of music. If technology is applied, the concert could bring about 360-degree and panoramic 3D visual effect for the enjoyment of the audience. Furthermore, technology, through digital arrangements, allows the audience to choose their own appreciation preferences for a personalised viewing experience, and even enables them to participate in the show through virtual reality means. All of the above have indeed broadened the scope of appreciation and chance of participation of the audience in art shows.

The Application of Art-Tech and Its Benefits

The Hon Mr Ma Fung-kwok pointed out that the most important feature of art-tech is that it allows artists to go beyond the limit of time and space, and often brings about brand-new cultural experiences, so we can appreciate or even participate in art shows, anytime anywhere through different media platforms. This is best adopted in visual and performing arts.

Dr Chen opined that art and culture can enrich our life. Through the application of technology like virtual reality, augmented reality, blockchain, etc., we can avail ourselves of a novel approach to art thereby raising the artistic and cultural attainments of society to the next level.

Prof Poon remarked that the applications of art-tech are extensive. Cultural and creative industries involve different sectors like film, television, music, stage shows, visual and performing arts, etc. Integrating technology with art will bring about three key benefits: (1) Art-tech can promote art creation; art archives can preserve art culture and heritage; (2) Art-tech can widen audience's participation and deepen their appreciation of the art; and (3) Its application will contribute to further socioeconomic growth in society, benefiting among others, the art creators, operators, and the audience as well.

Prof Shaw indicated that expanded cinema, virtual reality and augmented reality are some of the most creative technologies used in art today. HKBU is setting up a next generation Future Cinema system – a first-of-its-kind interactive 3D 360-degree LED visualisation arena as a platform intended to research and innovate the future

Prof Johnny Poon
潘明倫教授

浸大協理副校長（跨學科研究）、
創意藝術學院創院院長及
孔憲紹博士音樂教授

何謂藝術科技

藝術科技一詞由來已久，據邵志飛教授述說，可追溯至六十年代在紐約成立以促進藝術和科技發展為宗旨的 Experiments in Arts and Technology。及後全球湧現藝術科技合作平台，諸如奧地利的 Ars Electronica、德國的 ZKM、東京的 ICC、澳洲的 ANAT、美國的 MIT CAVS 和蒙特利爾的 SAT。

邵教授指出藝術科技是一個當代藝術研究和文化平台，藝術家在不同媒體如舞蹈、戲劇及音樂等進行科技與藝術互融的創作，造就及展現多元化的藝術，同時呈現跨領域互動的效果，推動跨領域創作多元化。

潘明倫教授闡釋科技與藝術的結合，代表著藝術創作的創新和演進，科技促進藝術創新，是推動、塑造和激發當代藝術的關鍵；同時，藝術創新亦可激發科技進步。科技進步影響藝術家藝術創作、表達和交流；同時新的藝術展現也影響我們接收、享受和消費藝術的模式。陳杰博士補充，以音樂表演為例，以往觀眾只可從單一角度欣賞演奏，科技的突破，為觀眾帶來 360 度全景 3D 的視覺享受和個人化的觀賞平台，供觀眾自由選擇不同的演出環節以及觀賞的人物和方式，甚或參與虛擬的演出。科技確實拓闊了大眾共同參與及觀賞藝術的機會。

藝術科技的應用和優勝之處

馬逢國議員指出科技最大的特點是讓藝術突破時間和空間的限制，帶來嶄新的文化體驗，我們可隨時隨地透過不同媒體參與和欣賞藝術，這些優勢都充份體現在視覺藝術以至表演藝術上。

Art-Tech in Hong Kong: How to Position Itself and What Competitive Edge It Possesses

The worldwide development of art-tech is thriving. In the *National 14th Five-Year Plan*², Hong Kong has been designated as an “International Innovation and Technology Hub” and an “East-meets-West Centre for International Cultural Exchange” in order to raise its competitiveness. The *2020 Policy Address*¹ has first outlined the development of art-tech and its related policy, confirmed the potential of Hong Kong’s cultural and creative industries, and considered art-tech a new driving force for economic development. Furthermore, the Government has set aside HK\$100 million for the advancement of art-tech, and set up an inter-departmental working group responsible for its effective coordination and promotion in Hong Kong. Moreover, the East Kowloon Cultural Centre will serve as the cradle for art-tech. In the *2022-23 budget*³ of the Government, a further allocation of resources has also taken place for the promotion of art-tech development.

The Hon Mr Ma stated that Hong Kong is a free and open society, and the Government has provided various forms of funding to facilitate the development of art-tech. Nevertheless, Hong Kong is still lagging behind other parts of the world like the U.K. and South Korea, where the relevant development strategies with regard to art-tech have already been put in place. As of now, the Government has not had a designated department to coordinate art and culture development in Hong Kong. There is more to be done concerning the protection of art and cultural works, through the enforcement of intellectual property rights. If Hong Kong is to be transformed into a smart city, art-tech is indeed one of the indispensable elements. To exploit the opportunities arising from the development of art-tech, Hong Kong needs to give the traditional art and culture a contemporary and modern interpretation. Typical examples include the *Digital Dunhuang* project that was first researched in Prof Shaw’s *Pure Land 360* in 2012, and the *Animated Version of the Riverside Scene at Qingming Festival* earlier staged in Hong Kong. Prof Poon supplemented that the East-meets-West heritage and its multicultural and inclusive tradition are Hong Kong’s unique competitive edge, which brings about spontaneous motivation for its art and cultural industries.

Tips for Mastering Art-Tech – Transdisciplinary Skills

The Hon Mr Ma elaborated that in the digital era, the integration of arts and technology represents the interaction between humanities and science. The development of art and culture needs the input of technology to raise it to the next level, while breakthroughs in technological development will depend upon the

陳博士認同藝術和文化豐盛人的生活。通過科技應用，例如虛擬實境、擴增實境、區塊鏈等，賦予藝術新形態，讓藝術文化向前跨進一步。

潘教授表示藝術科技應用層面廣泛，文化及創意產業涉及電影、電視、音樂、舞台、視覺藝術、表演藝術等多個範疇。融合科技於藝術創作有三大好處：其一可促進藝術創新和傳遞，同時藝術數碼化有助保存藝術文化遺產，讓藝術文化得以保留和傳承；其二可以擴大觀眾的參與及深化他們對藝術的鑑賞；其三藝術科技的應用，可提升社會經濟增長，使創作者、營運者以至受眾，皆能受惠。

邵教授直言擴展電影、虛擬現實和擴增實景等技術是當今最具創造性的技術。浸大現正構建新一代的影院系統——首創「互動式 3D・360 度 LED 視覺數碼舞台」。這將成為文化遺產數碼化、沉浸式舞蹈和戲劇及互動式多媒體存檔等項目的研究平台。

香港的藝術科技定位何在？優勢何存？

全球藝術科技發展方興未艾，國家「十四五規劃」²已將香港定位為「國際創新科技中心」及「中外文化藝術交流中心」，以提升香港的競爭優勢。2020 年的《施政報告》¹中，首次提及本地藝術科技的發展和政策，肯定文化及創意產業的潛力，視之為經濟發展的新動力，成立跨部門專責小組推動藝術與科技融合，更預留一億元作發展之用，並以東九文化中心作為藝術科技的搖籃。於《2022-23 年度財政預算案》³，香港政府額外注資以鼓勵更多藝術科技的探索。

馬議員認為香港擁有自由開放的氛圍和空間，政府在經濟上亦給予資源，但相對世界各地藝術科技的發展，香港在這方面顯然有點滯後。如英國以及南韓早已制訂藝術科技發展政策，香港至今仍未有專責部門協調統籌有關政策，對文化藝術創作如知識產權的保護亦有待加強。此外香港要蛻變成智慧城市，藝術和科技的結合不可或缺。當務之急是要把握藝術科技發展的機遇，以現代化的包裝重新演繹傳統文化。藝術科技活生生的例子包括邵教授於 2012 年的藝術項目「數碼敦煌」及早前在香港展出的「活化《清明上河圖》」等

advancement of artistic skills. To solve social problems, we need to adopt a humanistic approach by means of art. That being the case, technocrats should adopt a humanistic approach when working on art-tech projects. Simultaneously, artists need to know how to garner the power of modern technology in their work. All in all, capturing transdisciplinary skills is of utmost importance especially in this Big Data era.

HKBU Endeavours to Promote Art-Tech

All four guests agreed that enhancing transdisciplinary skills among young people is the crux for the long-term development of art-tech in Hong Kong. To that end, the higher education sector has a crucial role to play. The University is committed to developing art-tech in teaching and research to cater for society’s needs. In the 2022-23 academic year, the University will pool together top-notch scholars/researchers and talents in artistic creation to start a new school, the School of Creative Arts. The new school will strengthen the University’s efforts in integrating arts and technology, and fostering their collaborations, all these for taking art-tech education and research to reach the creative pinnacle. Additionally, the University will offer four brand-new transdisciplinary undergraduate programmes⁴ in 2022-23, one of which is the Bachelor of Arts and Science (Hons) in Arts and Technology, which provides integrated training in the disciplines of science, technology and humanities. As Founding Dean of the School of Creative Arts, Prof Poon said that the University will equip students with a set of transdisciplinary and multifaceted skills, and inculcate in them an open-minded attitude. Moreover, the University will seek collaborations with industries to provide internship opportunities for students so as to broaden their professional knowledge and help them build up network in their respective disciplines. In the area of research, the University has embarked on a project *Building Platform Technologies for Symbiotic Creativity in Hong Kong*, which aims to develop platform technologies for the promotion of AI in artistic work, so as to usher Hong Kong into a new era of art-tech.

馳聘藝術科技時代的秘訣——跨領域的能力

馬議員剖析，在數碼化年代，藝術科技共融代表人文與科學須互動，藝術文化發展要融入科技，以提升藝術的表現；科技發展突破有賴藝術造詣的提升。要解決當今社會的問題，必須透過較人性化的方法和手段，而藝術就是人性化的展現。因此，科技人才要了解人文藝術，藝術工作者亦要懂得運用科技。總而言之，掌握跨領域的能力在大數據年代尤為重要。

浸大致力推動藝術科技發展

四位嘉賓均認為香港要積極培訓具備跨學科能力的人才，以助長遠藝術科技發展，當中高等教育扮演重要的角色。浸大在學術和科研方面，亦銳意發展藝術科技以配合社會發展所需。大學將於 2022-23 學年成立創意藝術學院，匯聚校內頂尖的藝術創作及科研專才，加強藝術及科技的融合及協作，將藝術科技的教育及研究水平推至高峰。此外，大學將於新學年推出四個全新跨學科本科課程⁴，其中藝術及科技文理學士（榮譽）課程，融合科學、科技與人文學科的培訓。創意藝術學院創院院長潘教授表示，大學將透過傳授跨學科的多元化知識以培養學生的開放式思維，亦會致力與業界合作，為學生提供實習機會，培養他們全面技能並建立業界人脈網絡。在科研方面，浸大透過「香港人機共生藝術創造平台技術建設」研究計劃，為香港開發一個創新的藝術平台，推動藝術工作者與人工智能結合共創藝術，引領本地的藝術科技邁進新時代。
